25 YEARS EXPERTISE AND KNOW-HOW

DESIGNER OF PROFESSIONAL OFFICE FURNITURE

The Buronomic factory is based at Honfleur in the Calvados department of France, on a 40 000 m² covered site. For over 20 years, the company has supplied professional office furniture for French and European companies and government departments, through the partnership developed for many years with our national and international networks of furniture distributors. You will always find a Buronomic approved specialist dealer near you.

BURONOMIC TECHNOLOGY

By implementing continuous quality control through the industrial process, Buronomic can guarantee the conformity and reliability of its products. Our joinery workshops are equipped with high-tech numerically controlled machines ensuring extremely high precision in the cutting, veneering and drilling steps. Buronomic is equipped with over 35 latest-generation machines. With over 1700 parcels shipped every day, a production site of more than 25 000 m² and a storage area of 15 000 m², Buronomic is a leading manufacturer of professional office furniture in France. Buronomic implements a bar code system allowing traceability of the parcels, from transformation of the raw materials through to delivery.

OUR COMMITMENT

“AS DESIGNER AND MANUFACTURER OF OFFICE FURNITURE, I AM CONVINCED THAT WELL-BEING AT WORK IS A KEY SUCCESS FACTOR FOR YOUR EMPLOYEES. EVERY DAY, BURONOMIC STRIVES TO CREATE A PLEASANT OFFICE ENVIRONMENT. BURONOMIC'S LIVING DESIGNS PLACE MEN AND WOMEN AT THE HEART OF THE ENVIRONMENT.”

CHRISTIAN BRESCIANINI
CEO OF BURONOMIC

CERTIFICATIONS

Buronomic relies on applicable standards and certifications for professional furniture.

What is NF ENVIRONMENT certification?

The standard corresponds to a global approach which takes into account the various steps in the product life cycle with criteria concerning:

- the materials used and their components,
- the impact of the manufacturing site on its environment,
- energy management,
- packaging, logistics and transport,
- the information provided to the consumer,
- the product's end of life.

"NF ENVIRONMENT certification is your guarantee that you are purchasing a clean and sustainable product."

Danielle
Regional Director West

What is the NF BUREAU SECURITE CONFORTIQUE certification (French Standard for the Safety and Comfort of Office Furniture)?

The standard corresponds to the label NF Bureau with a set of tests certifying that the products comply with safety and sustainability normative requirements. In particular, they take into account comfort and ergonomics at work. In addition, the German GS certification label is obtained due to the higher performance level achieved through the Sécurité Confortique standard.

"NF bureau SECURITE CONFORTIQUE certification is your guarantee that you are purchasing a product offering professional excellence."

René-Jean
Regional Director North East

What is PEFC certification?

The PEFC certification (Program for the Endorsement of Forest Certification) guarantees that the wood used in our products comes from sustainably managed forests. It also represents an essential tool in the fight against illegal wood trade.

"With PEFC, Buronomic and its customers protect the environment."

David
Regional Director South East

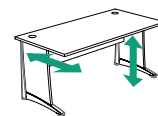

Buronomic's furniture is certified NF bureau and therefore complies with British Standards (BS): EN 527 for desks, EN 14073 and EN 14074 for pedestals and storage units.

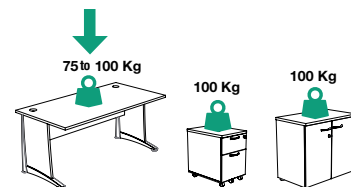

TESTS

The certified products are tested by the FCBA technological institute (Forestry, Cellulose, Construction timber and Furniture) according to the European Standards applicable to professional furniture.

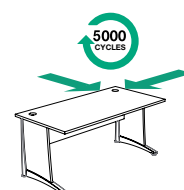

All products are tested in terms of safety of use for consumers, in particular to prevent any risks of pinching or cutting. The metal and Structurex® finishes of the furniture are tested for their resistance to scratches and abrasion, gloss, staining products and impacts to guarantee optimum lifetime and sustained user comfort. Only products satisfying these tests can be declared conform; you will therefore always find the NF ENVIRONNEMENT, NF SECURITE CONFORTIQUE and GS labels on the certified products.

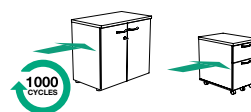

The height and depth of the desks are checked to guarantee optimum ergonomics.

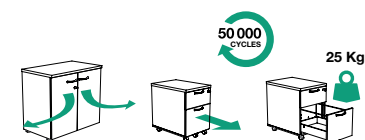

The stability and lifetime of our desks, pedestals and storage units are analysed according to several vertical static load tests.

The desks undergo a lateral force on 2 axes for 5000 cycles to ensure that the structures will last.

The storage undergoes a lateral force on 1 axis for 1000 cycles to ensure that the structures will last.

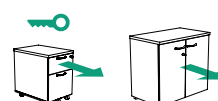

The storage units and pedestals are opened 50 000 times (drawers loaded for lateral filing) to test their durability.

The pedestals are also tested under a vertical load of 25 kg, with the drawers open, to guarantee their load capacity.

The shelf brackets of the storage unit are tested under static load of 1.5 kg/dm² with a weight of 1.7 kg dropped 10 times on the support pegs.

The doors and removable components of the storage units and pedestals undergo a locking safety test under a traction force of 20 kg.

FOLLOW-UP & CONTINUOUS IMPROVEMENT

Our Environmental commitment is an integral part of our quality system. In addition to product testing, NF and PEFC AUDITS are conducted every year on our site to measure the results of our actions and identify any improvements required in terms of sustainable development.

"For example, we are well above the PEFC standard, since in 2010 we purchased more than 92 % of PEFC wood compared with the minimum threshold of 70 %. We are actively committed to the planet!"

Emmanuel
Purchasing Manager

OUR VALUES

THE DAILY COMMITMENT OF THE BURONOMIC TEAMS TOWARDS SUSTAINABLE DEVELOPMENT IS BASED ON THREE ETHICAL VALUES: ECOLOGICAL INTEGRITY, SOCIAL EQUITY AND ECONOMIC EFFICIENCY.

SOCIAL EQUITY our corporate citizenship commitment, men and women are the foundation of our future. For Buronomic, social development involves the LOYALTY and WELL-BEING of our EMPLOYEES and PARTNERS.

"Buronomic plays an active role in the development and promotion of the industry. We are one of the founding members of the Actineo observatory on the quality of life in the office."

Christian Brescianini
CEO of Buronomic

"The 400 m² show room permanently updated with the new products is a superb tool for our distributors and their customers."

Hugues
Regional Director Ile de France

"Our 140 employees are proud to show visitors around the site and pleased to demonstrate to our customers the performance of the manufacturing process, the French quality of our products and their well-being at work."

Philippe
Quality Manager

"Most of our customers, suppliers and service providers have been loyal to Buronomic for more than 20 years. They play an active role in the construction of our future."

Christian Brescianini
CEO of Buronomic

ECOLOGICAL INTEGRITY

is vital since our decisions have a direct impact on our environment and that of future generations. ENERGY management and ECO-DESIGN are our key ecological guidelines.

"10 years ago, we had already purchased a Biomass boiler for the factory. We heat 21 000 m² of buildings and save 1300 of oil tons equivalent every year. At the same time, we have improved our waste recycling, with 95 % currently being converted."

Bernard
Production Manager

"The universal desking project group worked for 2 years on the layout platform. The project has now taken shape with 6 universal finishes, 7 desk ranges, 3 lines of Structur[®] pedestals and 1 line of storage units. Customers have more choice and there are fewer components, there is a lot to be said for eco-design!"

Eric
Product Development Managers

"By reducing the volume of packaging and introducing recycled packaging, we save the equivalent of 45 lorries shipped every year and simplify recycling of packaging for end customers."

Johan
Methods Manager

ECONOMIC EFFICIENCY

At Buronomic, PROFESSIONAL office layout and DESIGN services are accessible to all our customers within VERY SHORT DELAYS.

"With 6 finishes and 7 ranges of desks offering various shapes and combining 20 different leg styles in stock, there is always a suitable and aesthetic solution for my customer. It's great"

Jean-Michel
Regional Director South West

"With the new order picking circuit we save time and reduce the energy consumption of our fork lift trucks by 20 %."

Laurent
Shipping Manager

Buronomic decided at a very early stage to deliver quality products based on preservation of the environment:

2002	Biomass boiler installed on the factory
2003	1st range certified NF Sécurité Confortique & GS
2004	ISO 9001 certification
2005	In-house manufacture of cardboard packaging
2006	PEFC certification
2007	Transition to desk tops shrink-wrapped without polystyrene
2008	Advanced cutting-off saw
2009	1st range certified NF Environnement
2010	Flexible line for the manufacture of Structur [®] pedestals
2011	New platform of Operator desking ranges certified NF Environnement and NF Sécurité Confortique.

"In the dispatch department, the cardboard box machine makes our lives easier. This means that 3 lorries less come in every week and we have the material we need to manufacture urgent orders for our customers."

Yannick
Reception Manager

"For customers in a rush, I recommend choosing furniture from the Buronomic catalogue. We deliver and assemble the desks within 1 week. If necessary, we also study the layouts and prepare an installation drawing. Simple and efficient."

Olivier
Furniture Distributor
in La Roche sur Yon

QUALITY

1. Pleasant offices
2. French Industrial Joinery
3. Eco-responsible company
4. Durability of ranges
5. Functional, ergonomic furniture
6. Easy layouts

SERVICE

1. National and international networks
2. Approved network of Distributors and Installers
3. Consultant distributor near you
4. Global solution for all your furniture
5. Permanent stock
6. Short lead-times

GUARANTEE

1. Design according to European Standards
2. Testing of mechanical reliability and finishes
3. Approved suppliers

By entrusting your project to a Buronomic Furniture Dealer, you benefit from an additional 2-year guarantee period, extending the guarantee of your Buronomic furniture from 5 to 7 years.

STRUCTUREX® PANELS

- Structurex®-coated particle board
- Thickness 16 to 25 mm
- Counter-balanced
- Anti-reflection treatment
- Density 680 kg/m³ (+/- 5 %) for the 25 mm panels
- Imitation wood decorative finish
- Conformity tests: resistance to abrasion and to hot and cold liquids carried out according to standard XP D60-050

STRUCTUREX® PANEL EDGING

- Thick, shock-proof ABS edging
- Thickness 2 mm

METAL INSERTS

- Metal to metal fixing for greater resistance
- Safe and repeatable assembly and dismantling (electric screwdriver or Allen key)
- Metal insert attachments for greater stability and durability
- Factory-assembled metal inserts

CAMS

- Complete tightening
- Excellent stability
- Easy assembly and dismantling

EPOXY PAINT

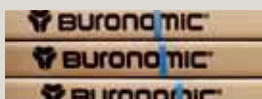

- Shock resistance
- Scratch resistance
- Torsion / folding resistance
- Corrosion resistance

HIGH LEVEL OF QUALITY FOR PROFESSIONAL USE

PACKAGING

- Packaging tested under extreme conditions: drop tests / palletising tests

CHOOSE PROFESSIONALISM, PROXIMITY AND SERENITY

The members of the Buronomic specialist office furniture network were selected to offer a global and extremely reactive response for your office layout requirements.

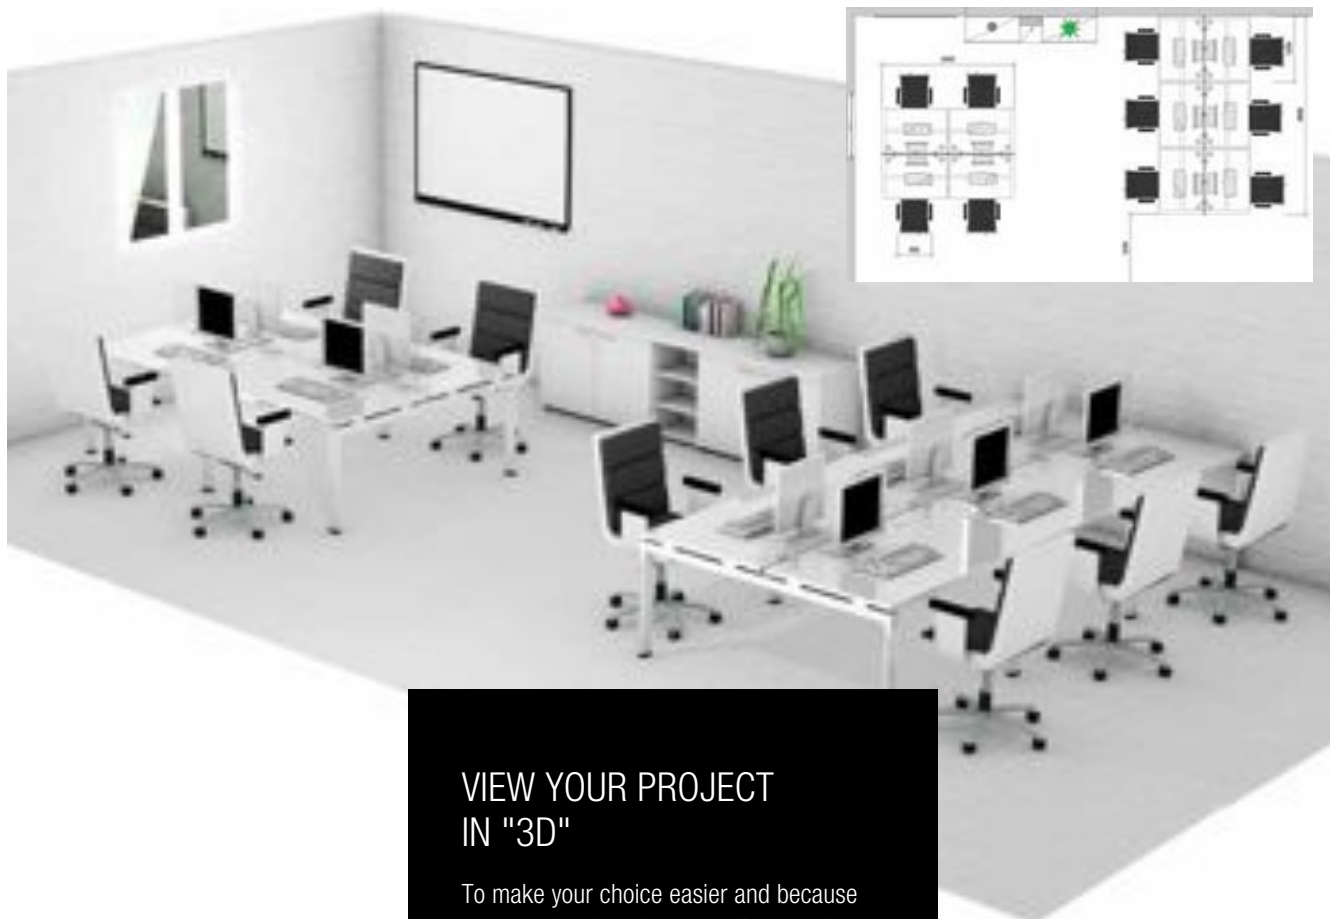

Recognised for their know-how, they can deliver first-class, highly competitive services. They will advise you on how to optimise the layout of your work spaces and provide support from design to implementation of your project, in England and abroad.

THE GUARANTEE OF A SPECIALIST

- 1 • **Respect** of short lead-times.
- 2 • **Guarantee of choosing** your furniture in complete serenity through permanent support from start to end of your project.
- 3 • **Customised Office Layout Programme** upstream from the service.
- 4 • **Almost unlimited choice** from **the most** extensive range of office furniture.
- 5 • **Quality of furniture** manufactured in France in compliance with some of the most demanding standards.
- 6 • **5-year guarantee + an additional 2 year guarantee offered** covering parts, labour and travel.
- 7 • **Customised follow-up** by communicating with the same contact throughout the project.
- 8 • **Installation charter** binding the Distributor to highly rigorous standards.
- 9 • **After-sales service** within a maximum of 48 hours.
- 10 • **7-year reorder guarantee** for all reference finishes.

YOU ANTICIPATE YOUR REQUIREMENTS IN TERMS OF ACCESSIBILITY, COMFORT AND ERGONOMY.

FOLLOW THE GUIDE TO DESIGN YOUR OFFICE LAYOUT QUICKLY AND EASILY IN

8 KEY POINTS

1

CHOOSE THE SHAPE AND LAYOUT OF YOUR DESKS.

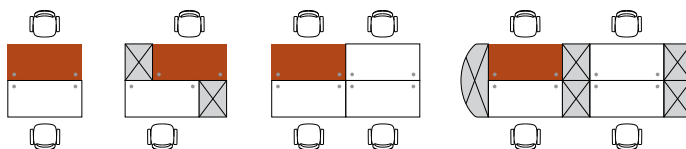

Buronomic allows you to create a customised workspace. Curved or straight tops, used in clusters, individually or in a reception area...

Numerous layouts are available with an infinite number of possibilities.

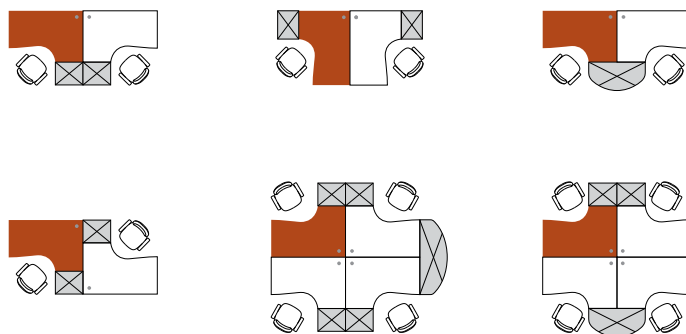

With Buronomic, you are sure to find the combination matching your layout requirements.

Some examples of multi-workstation configurations are shown below. See page 2 for all top shapes.

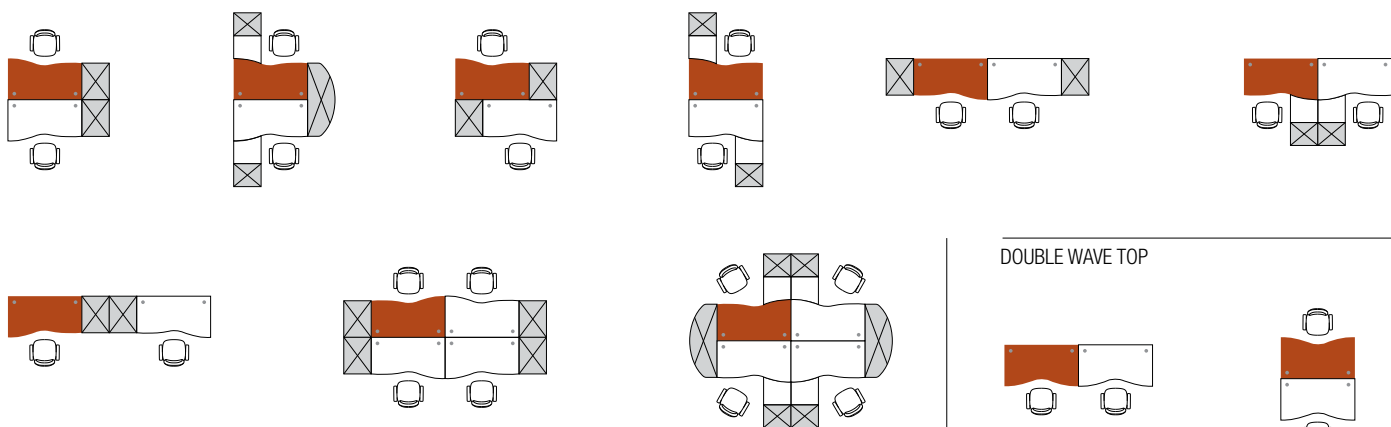

STRAIGHT TOP

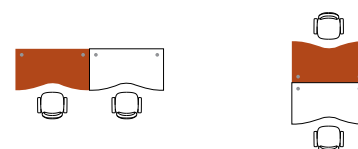

COMPACT TOP

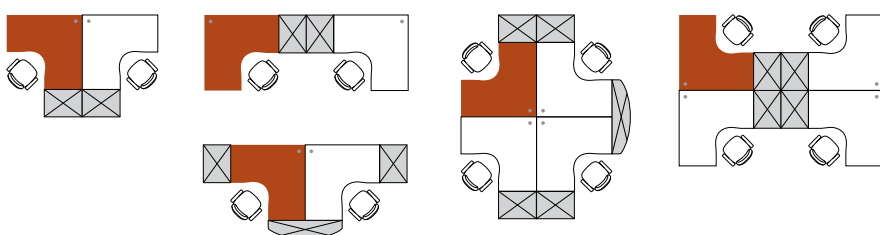

WAVE TOP

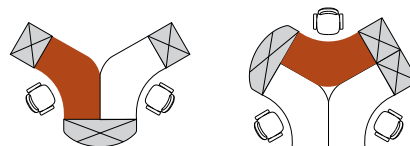

DOUBLE WAVE TOP

90° SYMMETRICAL TOP

120° SYMMETRICAL TOP

2

SELECT THE LEG DESIGN

The leg emphasises the product's aesthetics and ergonomomy. Choose your favourite design from the numerous ranges, whether Structurex® or metal legs.

STRUCTUREX®

PANEL LEG: ATTRACTIVELY-PRICED AND SOBER
Osmose 2 range p. 104, Buraile range p. 110

CANTILEVER LEG: COMFORTABLE AND AESTHETIC
Osmose 2 range p. 104, Buraile range p. 110

METAL

C LEG WITH STRUCTUREX® MODESTY PANEL: DISCRETE, WARM FINISH
Colorfit range p. 80, Optineo range p. 98, Osmose 2 range p. 104, Buraile range p. 110

C LEG WITH METAL MODESTY PANEL:
CABLE MANAGEMENT AND LATERAL LEG ROOM
Colorfit range p. 80, Optineo range p. 98

C, I OR V LEG WITH BEAM: FUNCTIONAL AND TECHNICAL
Colorfit range p. 80, Convisteel range p. 86, Opteam range p. 92

ADJUSTABLE I LEG WITH BEAM: ERGONOMY AND ADAPTABILITY
Opteam range p. 92

ARCHE LEG: MULTI-WORKSTATION LAYOUT
Astro range p. 72

3

EXTEND YOUR DESK

Extensions are the ideal solution to welcome visitors or create more working space. See p. 116

4

SELECT YOUR PROXIMITY STORAGE

Depending on your organisation, choose flat drawers or lateral filing drawers. Need mobility or extra space? Choose from the following solutions:

Standard mobile pedestals stored under your desk.

Universal desk height pedestals attached to the desk top with a wide range of top shapes and dimensions

Desk height pedestals with or without top box.

Mobile multi-purpose pedestals: Persobox, J Mobile and Mobilo or mobile consoles with or without drawers

PEDESTALS

Use the selection guide to choose pedestals from the Structurex® ranges with Comfort and Premium or metal with Median. See p. 118

5

CUSTOMISE YOUR OFFICE SPACE

Choose from the wide range of deco accessories, lighting, partitions and technical equipment to make your desk comfortable, functional, original and ergonomic. See p. 132

BRING NATURE INTO YOUR ENVIRONMENT

Discover the decorative plants which will help make your office a pleasant environment. See p. 240

6

COMPLETE WITH THE CHAIRS AND MEETING TABLES

Choose an ergonomic chair to guarantee your comfort at the office. Welcome your visitors in matching chairs. See the meeting section from page 196.

CHAIRS

Discover our ergonomic tips to make the right choice p. 244

7

ORGANISE YOUR FILING

Complete your installation with Structorex® or metal finish peripheral storage units available in a wide choice of dimensions and models.
From 72 cm to 203 cm high in numerous widths, the cabinets are available in several versions: open or lateral filing drawers, swing, sliding or tambour doors.
See the storage ranges from page 134.

8

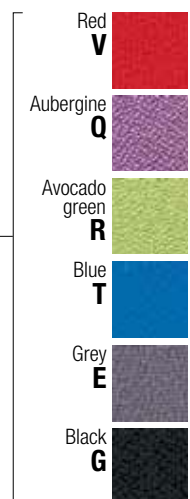

CHOOSE THE FINISHES AND COMPLETE THE REFERENCES

Choose the ambiance that reflects your personality:
Contemporary, Modern or Traditional see p. 14
Discover the coating finishes available for the desks, seats, storage units, etc.
See the list of finishes proposed on the swatch.

The following photograph gives examples of finishes with explanation of the legend.

imitation
finish

DATA SHEET

The **Astro Arche leg design** is an epoxy finish metal arch, cross-section 70 x 30 mm. The Arche leg is available in single version for 1-position workstation and/or double arch for shared workstations.

The **ASTRO Arche range** is based on a self-supporting beam system with raised desk tops, forming a full steel underframe with 2 Arche legs and a transverse beam.

The **adjustable screw jacks** on the legs allow up to 15 mm adjustment so that the 72 cm high desks stay flat, to compensate for any defects in the floor. In back-to-back configuration, a space divider can be fitted in the 3 cm gap provided between the tops.

The **25 mm thick Structorex® tops** are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port. For 160 x 80 cm tops, a variant is available with top access compatible with a cable channel (plug & play).

The **suspended Astro Arche** modesty panel is optional.

Available in translucent Plexi, metal or Structorex® finish. It is attached under the top with stylish brackets. This option is not compatible with the plug & play cable channel. Other channels designed to route cables and accommodate power outlet strips are available on option.

FINISHES

DATA SHEET

The Colorfit metal leg consists of a structural column with a **design base** to add a touch of colour with the **foot cover**. All leg components have an epoxy finish. The removable cap on the column provides easy access to the cable channel.

The Colorfit range is available in 3 versions:

- Beam system forming a full steel underframe with 2 legs and a transverse beam. The beam is designed to route cables and accommodate power outlet strips.
- Underframe with 2 legs connected by a Structurex® finish structural modesty panel.
- Underframe with 2 legs connected by a metal finish structural modesty panel.

The adjustable screw jacks, on the legs allow adjustment of up to 15 mm so that the 72 cm high working tops stay flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port, apart from the 120° symmetrical top. For 160 x 80 cm straight tops, a variant is available with top access compatible with a cable channel (plug & play).

Modesty panels

- **Optional with the beam system**, they are available in Structurex®, Plexiglas or metal finish. The modesty panels are assembled with epoxy finish metal brackets. The Structurex® and Plexiglas finish of the brackets matches the foot cover. The metal brackets have the same finish as the modesty panel. This option is not compatible with the plug & play cable channel.
- **Structural modesty panels**, are made from 16 mm Structurex® with thin edging. Metal modesty panels are made from 8/10 sheet with a design finish consisting of a row of empty circles at the bottom of each corner. Each modesty panel version is equipped in the top with cut-outs to feed cables from the cable port to the optional horizontal cable channel.

V LEG

C LEG

A PERFECT CHOICE FOR A SUCCESSFUL LAYOUT

V LEG - WAVE TOP

" We chose Convisteel to equip two departments with different requirements. With its pure line, the V leg matches the style of our customer reception area perfectly.

The C leg and its practical cable channel system proved ideal for the computer department."

Xavier

Facilities department manager

in Puy en Velay

C LEG - RECEPTION COMPACT TOP

"We contacted an office distributor to reorganise our R&D departments. Our technical and environmental specifications were extremely precise. We chose Convisteel for its numerous combinations and its NF Environnement and NF Sécurité Confortique certifications."

Gérard

Project manager in Annecy.

DATA SHEET

The C leg consists of a base and a stamped epoxy finish metal upright.

The V leg consists of an epoxy finish metal double arc in the shape of an upturned V.

The Convisteele range is based on a beam system forming a full steel underframe with 2 legs and a transverse beam.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high working top stays flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port, apart from the 120° symmetrical top.
For 160 x 80 cm straight tops, a variant is available with top access flap combined with a cable channel (plug & play).

Optional suspended modesty panel. Available in Structurex®, translucent white Plexi or metal finish. It is attached under the top with stylish brackets. This option is not compatible with the plug & play cable channel.

DATA SHEET

The epoxy finish metal Opteam legs are available in 3 versions:

The Cantilever C and I legs without decorative cover.

The Equipped C and I legs with removable decorative cover to hide the cables routed down through the leg.

The Adjustable Cantilever I Leg to vary the desk height from H 62 cm to H 82 cm.

The Opteam range is based on a beam system forming a full steel underframe with 2 legs and a transverse beam. The Opteam beam is designed to route cables and accommodate power outlet strips.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the desks stay flat, to compensate for any defects in the floor.

The 25 mm thick Structurx® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port, apart from the 120° symmetrical top. For 160 x 80 cm tops, a variant is available with top access compatible with a cable channel (plug & play).

Optional Opteam suspended modesty panel. Available in translucent Plexi, metal or Structurx® finish. It is attached under the top with stylish brackets. This option is not compatible with the plug & play cable channel.

CANTILEVER C LEG - STRAIGHT TOP

EQUIPPED C LEG - COMPACT TOP

"Simple and efficient,

Optineo is the functional and economic solution to equip all my offices."

Jean-Philippe

Supermarket manager

in Nogent le Rotrou

"We had to fit out the conference rooms and

administrative departments with a very tight budget.

We chose tables of various colours with cantilever legs and metal modesty panels for the conference rooms. For the offices, we preferred the wood finish modesty panels to create a warm atmosphere and we selected the equipped legs to hide the wires."

Juliette

FINISHES

DATA SHEET

The epoxy finish metal Optineo legs are available in 2 versions:
The Cantilever C leg without decorative cover
The Equipped C with removable decorative cover to hide the cables routed down through the leg.

The Optineo Manager range is built around 2 legs connected by a Structurex® or metal finish structural modesty panel, forming an extremely strong structure.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high working top stays flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port, apart from the 120° symmetrical top.

The structural modesty panels made from 16 mm thick Structurex® are protected with thin edging or made from 8/10 mm sheet metal with a design finish consisting of a row of empty circles at the bottom of each corner.
Each modesty panel version is equipped in the top with cut-outs to feed cables from the cable port to the optional horizontal cable channel.

A HARMONIOUS DESK WITH SOPHISTICATED LINES

WOOD CANTILEVER LEG - COMPACT MANAGER

METAL LEG - STRAIGHT TOP

"I love the tight curves of my desk which set off the charm of its wood.

Also, the return on pedestal is the ideal solution to store the files I need to keep handy. The shape of the top and the extension match perfectly."

Astrid

Executive assistant in Niort

"My customer wanted

a welcoming and uniform environment throughout the company.

We suggested Osmose 2 combined with furniture with a matching finish from the conference, reception and meeting point ranges. The team feels comfortable in this new warm atmosphere."

Serge

Furniture distributor in Paris

DATA SHEET

Osmose 2 legs are available in 3 versions:
Panel Leg made from a 25 mm thick Structorex® solid panel, with a lacquered solid wood pillar at the back.
Wood cantilever leg consisting of a pillar and curved base made from lacquered solid wood together with a 25 mm thick Structorex® finish rectangular panel.
Metal leg with epoxy finish, equipped with a PVC cable channel.

The Osmose 2 range is built around 2 legs connected by a Structorex® finish structural modesty panel, forming an extremely strong structure.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high working top stays flat, to compensate for any defects in the floor.

The 25 mm thick Structorex® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port, apart from the 120° symmetrical top.

The structural modesty panels made from 16 mm thick Structorex® are protected with thin edging and equipped in the top in each corner with two cut-outs to feed cables from the cable port to the optional horizontal cable channel.

THE EXCELLENCE OF WOOD AT AN ATTRACTIVE PRICE

PANEL LEG - WAVE TOP

METAL LEG - COMPACT TOP

“Working as a freelance,
I needed a desk which
would fit into my living
environment. With its maple
wood finish and its plum red
colour, Buraile was exactly
was I was looking for.”

Pascaline

Computer graphic artist in Avignon.

“I was looking for a discrete
and welcoming desk for our
agency.

With a reasonable budget,
I was able to do an entire
composition from A to Z
with Buraile desks, convivial
extensions, seats and storage
units, all in the same finish.”

Armand

Estate agent in Angoulême.

DATA SHEET

Buraile legs are available in 3 versions:

Panel Leg consisting of a 25 mm thick Structurex® solid panel.
Wood cantilever leg consisting of a 25 mm thick Structurex® panel mounted on a curved base made from lacquered solid wood.

Metal leg consisting of a base and a stamped epoxy finish sheet metal upright. The leg column has 2 holes in the top and bottom sections to feed cables.

The metal cover clips into position along the full length of the leg.

The Buraile range is built around 2 legs connected by a Structurex® finish structural modesty panel, forming an extremely strong structure.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high working top stays flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port, apart from the 120° symmetrical top.

The structural modesty panels made from 16 mm thick Structurex® are protected with thin edging and equipped in the top in each corner with two cut-outs to feed cables from the cable port to the optional horizontal cable channel.

WITH AN EXTENSION,
CHOOSE THE FABRIC
TOP METAL PEDESTALS
TO ACT AS SPARE SEAT.
SEE P. 126

DATA SHEET

The extensions are made from 25 mm thick **Structurex®** and protected by 2 mm thick shock-proof ABS edging. They are compatible with all 72 cm high operator desk ranges.

The 50 mm diameter cylindrical legs are made from metal coated with epoxy paint.

They are equipped with screw jacks allowing adjustment up to 15 mm to compensate for any defects in the floor.

The desk tops are equipped with metal plates to connect the extensions to the desk.

COLLECTION**"With a cubic design**

and elegant finish, the new generation of Structurex® pedestals blends perfectly in my office.

I instinctively chose a wood finish, which creates a very warm atmosphere.

I selected the desk height version with 4 flat drawers."

Albert

Notary in Tarascon

"The Buronomic Structurex® pedestals

available in two versions, Comfort and Premium, have their own specific features.

We can therefore satisfy all our customers' requirements. I also systematically suggest the top box to add highly practical and friendly proximity storage to the pedestal."

Thierry

Furniture distributor in Dijon

DATA SHEET

The C01 storage units offer a wide selection of configurations with tall, low and glass swing doors and/or Lateral Filing (LF) drawers.

The units are equipped with screw jacks adjustable from the inside to compensate for any defects in the floor and so that several units of the same height can be aligned easily.
The C01 storage structures and fronts are made from 16 mm thick Structurex®.

The doors are protected by 2 mm thick ABS edging and equipped with noise-proof pads.
Metal hinges allow 100° opening. 3-point locking system. Locks have interchangeable cylinders and are supplied with two keys, one folding.

The Lateral Filing (LF) drawers are equipped with selective opening and anti-tilt system.

The handles, with notches for easy grip, are made from aluminium epoxy finish lacquered metal.
The White or Anthracite finish is available on option to match the leg finishes of your desk.

Shelves adjustable in steps of 32 mm, useful depth 36 cm.
Made from 8/10 mm sheet metal coated with Aluminium finish epoxy paint, they are designed for lateral filing.
Made from 22 mm thick decor finish Structurex®, they will be perfect to guarantee the neat appearance required with open bookcases.

The 25 mm thick tops are available in 160, 200 or 240 cm common tops to connect several storage units to produce an aesthetic result and ensure that the units are aligned perfectly, both in height and in depth.

C01 WALL

Can only be used attached against a wall with C01 storage units H 72 cm placed in front in the lower part. Available in single version L 80 cm or double version L 160 cm.
The wall is equipped with screw jacks are provided in the lower part to adjust the positioning of the assembly.

Columns

Made from 16 mm Structurex® with thin edging, the columns are equipped with screw jacks allowing up to 15 mm adjustment to compensate for any defects in the floor.

TAMBOUR DOOR CABINET - H 104 CM

TAMBOUR DOOR CABINET - H 185 CM

WHEN BEAUTIFUL RHYMES WITH PRACTICAL

"I loved the C05 storage

unit and its tambour door with curved, harmonious and friendly lines.

My cabinet highlights the overall atmosphere of my office while offering efficient storage."

Evelyne

Estate agent in Orléans.

"The C05 storage units

can look very contemporary with their aluminium finish tambour doors or highly discrete with their more traditional wood finish tambour doors.

With a choice of 3 different heights, I have all the solutions I need to place low manager units side by side, a mid-height unit under a window or a tall cabinet."

Grégoire

Furniture distributor in Tours

DATA SHEET

The structure of the cabinets is made from one-piece welded epoxy finish metal.

The tambour doors consist of 28 mm wide smooth printed double strips. Since the tambour doors are made from polypropylene, these cabinets can be certified NF Environnement mobilier. Total opening by lateral sliding. The metal terminal strips offer optimum comfort with full-height grip. The lock is equipped with two plastic-coated hinged keys.

The adjustable screw jacks under the cabinets allow up to 15 mm adjustment to compensate for any defects in the floor.

The epoxy finish shelves are adjustable every 25 mm. They are designed to accommodate A4 lateral filing and are guaranteed to support a uniformly distributed load of 50 kg each.

H 198 cm

5 levels of LF* and binders for a total length of 5.35 m in width 1.2 m and 4.35 m in width 1 m

H 103 cm

DATA SHEET

C10 storage units:

The structures and fronts made from 16 mm thick Structurex® are protected by thin edging. The doors are equipped with noise-proof pads. Metal hinges allow 100° opening. 3-point locking system. Locks have interchangeable cylinders and are supplied with two keys, one folding. The structures are supported on adjustable screw jacks. The 25 mm thick Structurex® tops are protected by 2 mm thick shock-proof ABS edging.

Bookcases: 16 mm structure with thin edging finish. Fully adjustable locking shelves, will accommodate foolscap files.

Filing cabinets: Robust structure with full boxed drawers that take foolscap files as standard; Metal ergonomic handles and anti-tilt device to open one drawer at a time. Adjustable jacks are also provided to level the unit on uneven floors.

Aluminium finish handles.

Adjustable metal shelves designed to accommodate suspended files. Made from 8/10 mm sheet metal coated with aluminium finish epoxy paint.

Variants made from 22 mm thick Structurex® finish are also available since better suited for open bookcases.

DATA SHEET

The epoxy finish Astro Direction leg design of cross section 70 x 30 mm is based on the concept of a Ribbon with a raised desk top.

The Astro Direction range is based on a beam system forming a self-supporting full steel underframe with 2 ribbon legs and a transverse beam.

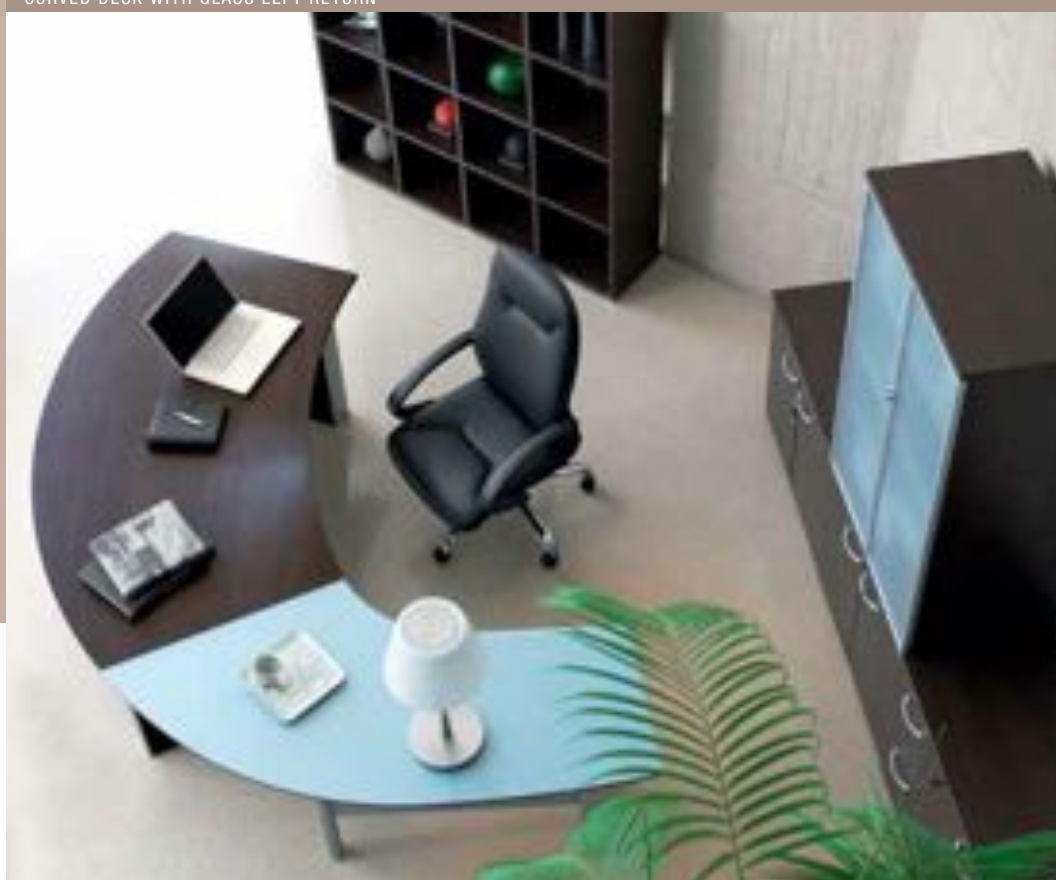

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high working top stays flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with two 80 mm diameter cable ports.

The optional Astro Direction modesty panel is available in 16 mm thick Structurex® with thin edging. It is attached under the top with stylish brackets.

THE AUTHENTICITY OF NOBLE MATERIALS

CURVED DESK WITH GLASS LEFT RETURN

“I visited Buronomic's showroom at Honfleur to finalise my choice. After looking at all the ranges, I chose Direction Style: the combination of glass, wood and aluminium contributes to the original and contemporary look of my new office.”

Florence

DATA SHEET

The Didra leg is made from two Structurex® panels. The inner panel (22 mm) has an aluminium finish and flat finish edging. The outer panel (25 mm) has an imitation wood finish, with vertical post formed edges on the sides.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 73 cm high working top stays flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® desk tops are protected by 2 mm thick shock-proof ABS edging on the visitor side and ergonomic post-formed edging on the user side.

The structural modesty panel is made from 25 mm thick Structurex®. It is post-formed at the bottom and decorated with 3 horizontal aluminium finish edging strips.

The 8 mm thick frosted glass return is equipped with a rectangular brushed metal cable channel. It is placed on top of a computer or storage pedestal. These lockable pedestals are made from post-formed Structurex®.

COMBINE THE C01 STORAGE AND THE WALL PANEL, TO CREATE YOUR CUSTOMISED BLACK AND WHITE DECO BOOKSHELF UNIT.

DATA SHEET

Osmose Manager leg made from a 25 mm thick Structurex® solid panel, with an aluminium finish lacquered MDF upright at the back.

The Osmose Manager range is built around 2 legs connected by a Structurex® finish structural modesty panel, forming an extremely strong assembly.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high imitation black ash desks stay flat, to compensate for any defects in the floor.

The 25 mm thick Structurex® tops are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port.

The structural modesty panels made from 16 mm thick Structurex® are protected with thin edging and equipped in the top in each corner with two cut-outs to feed cables from the cable port to the optional horizontal cable channel.

WOOD CANTILEVER LEG - COMPACT DESK

“We decided to reorganise
our office when a new consultant
joined our team.

We all selected for the timeless
style of the Classic 2 range with
its two-tone black/walnut finish.
We also find the new matching
meeting room really attractive.”

Armelle

DATA SHEET

Classic 2 legs are available in 2 versions:

Panel Leg made of a 25 mm thick Structurux® solid panel, imitation black ash.
Wood cantilever leg made of a 25 mm thick Structurux® panel, imitation black ash, mounted on a curved base made from aluminium finish lacquered solid wood.

The Classic 2 range is built around 2 legs connected by a Structurux® finish structural modesty panel, for an extremely strong structure.

The adjustable screw jacks on the legs allow up to 15 mm adjustment so that the 72 cm high desks stay flat, to compensate for any defects in the floor.

The 25 mm thick Structurux® panels are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port.

The structural modesty panels made from 16 mm thick Structurux® are protected with thin edging and equipped in the top in each corner with two cut-outs to feed cables from the cable port to the optional horizontal cable channel.

RECTANGULAR TABLES

"With the flip-top tables,
you can now organise a meeting
and set up everything you need at
the last minute! They can be opened
and closed with one hand and laid
out however you want. Perfect
stability with braked castors.
With round corners, the tables are
aesthetic and ergonomic. When
stored, the tables tops are locked
in vertical position and protected
against shocks. Just the job!"

DATA SHEET

With its round corners, the 25 mm thick Structurex® top offers ideal ergonomics. Depth 70 cm to save space.

The structure consists of 2 elliptical metal legs connected by a beam for perfect stability. These 72 cm high tables are equipped with large diameter castors with brakes.

The tables can be closed and opened easily with one hand and are locked in vertical and horizontal position. With the tops vertical, the legs nest together to minimise storage space: an extra 17 cm depth and 7 cm length for each additional table. The structures are fitted with pads to protect the tops in vertical position.

An optional connection kit is available to connect the tables together (inserts under tops).

DATA SHEET

The tops are made from 25 mm Structorex®. The tables are 72 cm high.

The leg design is a metal arch of section 70 x 30 mm, with a raised top.

The Astro Meeting range is based on a beam system forming a self-supporting full steel underframe with 2 arch legs and one or two transverse beams depending on the table formats.

The adjustable screw jacks on the legs allow adjustment so that the tables stay flat, to compensate for any defects in the floor.

Depending on the shape chosen, the tables can be grouped in modules. The recessed intermediate leg allows you to place as many as you want side by side, except for depth 60 cm.

SAT DOWN/STANDING UP, NEW MEETING STYLES

ARCHI TOP AND MOKA STOOLS

"I had been looking for a long time for a high table to display the fabrics to my customers.

With the Archi table and its numerous columns, everything I need is within reach.

The stools add a final decorative touch and create a friendly atmosphere in my workshop."

Julie

Sète

"To complement my office space at home,

I created a visitor's corner with an FL meeting table which gives everything a modern look. With several versions in wood finish or with a touch of colour, it was difficult to choose.

Pascaline

Computer graphic artist in Avignon

DATA SHEET

ARCHI

The 25 mm thick Structorex® barrel top, 180 x 100 cm, is protected by 2 mm thick shock-proof ABS edging. It rests on four 16 mm thick Structorex® columns with 3 compartments each. The table equipped with 4 columns in standard version can be configured up to 8 columns. The table top is attached to the columns by screwing into metal inserts. The columns are equipped with screw jacks allowing up to 15 mm adjustment to compensate for any defects in the floor. The table is 104 cm high.

FL ROUND

The 25 mm thick Structorex® top of diameter 100 cm is protected by 2 mm thick shock-proof ABS edging. The 25 mm thick Structorex® panel leg protected by 2 mm thick shock-proof ABS edging is equipped with screw jacks allowing up to 15 mm adjustment to compensate for any defects in the floor. The top assembled to the leg by metal inserts and cams guarantees optimum stability on the floor. The table is 72 cm high.

DATA SHEET

The 25 mm thick Structurex® tops are protected by 2 mm thick shock-proof ABS edging. The tables are available in 3 leg versions:

Panel leg and cross leg made respectively of 25 mm and 28 mm thick Structurex®. They are protected with thin edging on the vertical sections and equipped with screw jacks allowing up to 15 mm adjustment. The top assembled to the leg by metal inserts and cams guarantees optimum stability on the floor. The table is 74 cm high.

Trumpet leg made from epoxy finish metal. It consists of a 120 mm diameter tube and a 76 cm diameter base equipped with screw jacks allowing up to 15 mm adjustment. The top assembled to the leg by metal inserts and screws and the ballasted leg base provide perfect stability on the floor. The table is 72 cm high.

Cylindrical leg made from epoxy finish metal. It consists of a 50 mm diameter tube equipped with screw jacks allowing up to 15 mm adjustment. It is attached to the top by a screwed-on plate. The table is 72 cm high.

DATA SHEET

Made from 25 mm thick Structurux® and protected by 2 mm thick shock-proof ABS edging. The modesty panels are made from 25 mm thick Structurux® on the straight elements and the inverted corner and from epoxy finish curved sheet metal on the other corners.

The modules have 3 standard configurations: reception counters H 110 cm, low elements H 72 cm and low projecting elements H 72 cm to welcome persons of reduced mobility, according to the following diagrams:

The modules are combined with 60°, 90° and inverted 90° corners to create various layouts. All elements are equipped with 80 mm diameter lateral cable ports and vertical cable channels in the work tops of desk counters H 110 cm.

The elements are equipped with screw jacks allowing up to 15 mm adjustment to compensate for any defects in the floor and to align the modules. The units are connected by metal plates.

DATA SHEET

The 25 mm thick Structurex® counters are protected by 2 mm thick shock-proof ABS edging. The modules are assembled by metal inserts and cams and fastened to the desk by double-sided adhesive tape.

The 37 cm high straight elements can be placed on the 72 cm high standard desks to form a 109 cm counter suitable for welcoming people standing up. The niches are high enough for binders. The 120 and 160 cm straight elements are equipped with 2 compartments and one shelf, the 80 cm element has one fixed shelf.

These elements can be placed on straight, compact, wave and double wave tops of the same dimensions, for all ranges with matching finishes.

DATA SHEET

Columns

They are made from 16 mm Structorex® with thin edging. The columns are equipped with screw jacks allowing up to 15 mm adjustment to compensate for any defects in the floor.

BISTRO, CEYLAN & ZINC tables

The 25 mm thick Structorex® tops and legs protected by 2 mm thick shock-proof ABS edging are equipped with screw jacks allowing up to 15 mm adjustment. The tops assembled to the legs by metal inserts and cams guarantees optimum stability on the floor. The tables are 105 cm high.

TABOO & MOKA stools

The 25 mm thick Structorex® seat and cross leg are protected by 2 mm thick shock-proof ABS edging. Assembly by metal inserts and cams guarantees optimum stability on the floor. The 78 cm high stool is equipped with an epoxy finish metal footrest.

KAWA COFFEE END UNIT

The Structorex® end unit has 3 bottom shelves, including one with niches. The coffee machine rests on the top. The top part is equipped with two aluminium finish plates to protect against splashes and heat. The units can be used individually or combined with the Zinc half-moon meeting point, H 105 cm. The end unit is equipped with adjustable screw jacks allowing up to 15 mm adjustment. The back is 141 cm high.

Ergonomy tip

PLANTS IN YOUR OFFICE PROMOTE FEELINGS OF CALM, RELAXATION AND WELL-BEING. ADD A TOUCH OF NATURE TO YOUR WORK PLACE!

SEATS FOR EVERYONE

HOW TO CHOOSE A TASK CHAIR

The chair is an essential component in the ergonomic layout of a workstation.

It must be chosen according to 2 criteria: the user's morphology and function.

A well-designed office chair helps prevent frequent backaches, blood circulation problems and improves well-being at work.

HOW TO ADAPT YOUR CHAIR TO YOUR MORPHOLOGY?

By using the following adjustments: seat height, backrest height, seat depth, mechanism tension, armrest height

Which is the best working position for your health?

A few basic rules:

HOW TO CHOOSE AN ERGONOMIC CHAIR ADAPTED TO YOUR DAILY ACTIVITY

Mechanisms especially designed by the ergonomists help you find the most comfortable working position:

PERMANENT CONTACT

The backrest follows all your movements and remains in permanent contact with your back.
It can be locked in the required position and the backrest return force can be adapted to your morphology.
This mechanism is ideal for multi-purpose activities

SYNCHRONOUS

It is the most ergonomic solution. The backrest and the seat tilt in a coordinated ratio which guarantees the most comfortable angle at all times.
The strength of the backrest return force can be adjusted.
The reverse lock system prevents the backrest from springing back suddenly against the spine.
This mechanism is designed especially for office work.

CENTRAL TILT

The chair tilts backwards into a relaxing position. The tension can be customised to the user's morphology.
Stability is provided by a star-shaped leg fitted with double roller castors for carpeted floors. A hard floor castor kit is available to guarantee the safety essential on this type of floor.

The optional armrests also improve user comfort:
Fixed: they support the forearms to relax
Height adjustable: they can be adjusted to adapt to the user's morphology.
3D: the height and rotation can be adjusted for optimum comfort when working on the keyboard while avoiding the risks inherent to the carpal tunnels.

FABRICS

All our fabric chairs are upholstered with a CAMIRA Lucia covering.

Of weight 260 g/m², it is guaranteed to withstand 50 000 cycles in the Martindale abrasion test. Lightfastness: 6. Dry cleaning required.

Some stains can be removed by wiping with a damp sponge or by using a dry stain remover.

On chairs with mesh back, the backrests are upholstered with hard-wearing 100 % polyester black fabric, of weight 350 g/m², it withstands more than 100 000 Martindale cycles and complies with standard 1021/1 cigarette and 1021/2 match.
Our Direction chairs are covered with ECOPELLE synthetic leather.

GUARANTEE

Our chairs benefit from a 5-year guarantee, under normal conditions of use for 8 hours a day.

Seat cover wear is not included in this guarantee.
