flexa

Arms with 3D movements, forward, backwards, regulation of openness and degree of width between the arms. Furthermore, there are 10 different heights available so that any user can adapt it.

Syncro mechanism seat and back with a shifter. The control pads are telescopic to facilitate ease of operation. We are able to control the elevation, the movement of the seat and the angle of incline of the seat and back.

Horizontal movement of the seat with 5 positions, to adapt perfectly to the ergonomic user.

With an *Up-Down* system we are able to regulate the height in different positions.

Using an internal system we are able to regulate the position of a lumbar support, to adapt to different curvatures of the back.

Upholstered system with polyurethane foam injected

Lumbar adjustment regulator

Chrome arms with 3D movements

Polyurethane foam seat for maximum comfort, ergonomically tested to tilt forward slightly our back

Syncro mechanism with a shifter

Polished Aluminum base

High profile castors with rubber tread for better movement
