

work-in

# Work- flow

A collection of high chairs for specific work purposes with all the most advanced ergonomic features. Fully adaptable to the physical conditions of each user. Ultra-resistant materials such as chrome plated steel and new materials for seating surfaces, such as elastomer, highly recommended for professional use.

# work-in

Elastomer back-rest and seat, a material which adapts to your shape depending in the pressure applied. If there is no pressure it immediately recovers its initial state.

*Syncro* movement mechanism for complete ergonomic features, with the possibility of being able to choose the combined resting angle for the backrest and the seat. Also available with full contact movement system. Gas elevation system.

Chrome-plated steel footrest, to ensure the optimum leg comfort, rest and position for continuous seated postures. Chrome plated, steel elements.

Anti-slip chrome-plated base and caps, the security of perfect support on the floor using special, resistant, durable caps.
