

# BELLA [affordable posture]

# BELLA [high back]

Bi(3)scb

**The Bella range of operator seating with its unique back design complimented with affordable options, enhances any working environment.**

Mechanism options include a fully synchronised seat and backrest movement, which can be finely tuned to the user's weight and locked into multiple positions for support.

On mechanisms [3] and [4] illustrated on the back cover, the backrest is adjusted by simply lifting, this then automatically locks into position.

# BELLA [high back]

Bi(2)

**The inflatable lumbar is fitted as standard on all operator chairs.**

Mechanism [1] is supplied as standard and provides gas height adjustment and back rake adjustment on levers. Optional mechanism [2] provides gas height adjustment, back rake adjustment and an independent seat tilt with lever. Both mechanisms feature back height adjustment by handwheel.

The unique high back chrome cantilever is also available as a visitors chair to complete this versatile range.

# DIMENSIONS AND SPECIFICATIONS

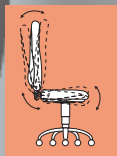

## [specifications]

### MECHANISM (1)

#### Independent back rake

Instant release lever for backrest rake adjustment.

### MECHANISM (2)

#### Asynchr seat and back

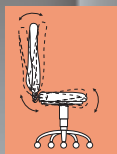

Instant release lever for backrest rake adjustment and independent seat tilt lever.

### MECHANISM (3)

#### Asynchr seat and back

Instant release lever for backrest rake adjustment and independent seat tilt lever with tension control. This mechanism features a finger tip control back height adjustment operated by lifting the back to one of five settings. Once you have reached the top height, the back will reset to the lowest position.

### MECHANISM (4)

#### Synchr seat and back

Fully synchronised seat and backrest movement at a ratio of 2:1 complete with tension control. This mechanism features a finger tip control back height adjustment operated by lifting the back to one of five settings. Once you have reached the top height, the back will reset to the lowest position.
