

[affordable functionality]

VIRTUO

[high back with visitors] VIRTUO

VH1

VH1

The Virtuo offers one of the most functional mechanisms on the market. Coupled with contemporary styling and support – the Virtuo gives the user unique posture control.

Freedom of movement is the key to the comfort and support of this chair. Careful research and development has resulted in the user being encouraged to adopt a more dynamic way of sitting – the pelvis is kept straight meaning that the spine assumes its natural S shape.

A moulded back is standard with this chair – encouraging healthy posture. The ergonomically designed controls mean that each user is able to adapt their seating position individually – making this a multi-user chair.
